

Replenishing Face Mask

Facial masks serve as an excellent part of your skincare regimen. A facial can be done right at home with the right products! The facial mask is a fantastic way to cleanse your skins, drawing out the impurities, dirt and dead skin cells. Facial masks can be used to fight acne, hydrate the skin and promote anti-aging. The beauty of it all is just great, however, the actual health benefits are wonderful too! Washing away stress, restoring moisture and promoting comfort and relaxation are also benefits to using a facial mask.

There are several benefits to using a face mask as a healing and replenishing modality! Check out our online store to see what products are available for you today! Contact our practitioner via email on the Contact Us page for questions about your skin health and general body care.
